Months Supply of Inventory	5.4	5.1	5.9%

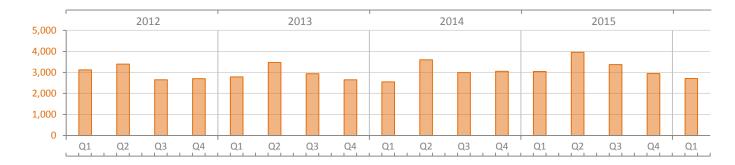

Closed Sales

Closed Sales

The number of sales transactions which closed during the quarter

Economists' note: Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales. Closed Sales (and many other market metrics) are affected by seasonal cycles, so actual trends are more accurately represented by year-over-year changes (i.e. comparing a quarter's sales to the amount of sales in the same quarter in the previous year), rather than changes from one quarter to the next.

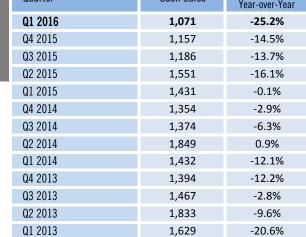

Quarter	Closed Sales	Percent Change Year-over-Year
Q1 2016	2,713	-10.9%
Q4 2015	2,951	-3.4%
Q3 2015	3,374	12.8%
Q2 2015	3,962	10.1%
Q1 2015	3,045	19.3%
Q4 2014	3,054	15.3%
Q3 2014	2,991	1.8%
Q2 2014	3,600	3.7%
Q1 2014	2,552	-8.5%
Q4 2013	2,648	-2.0%
Q3 2013	2,938	11.0%
Q2 2013	3,470	2.2%
Q1 2013	2,790	-10.6%

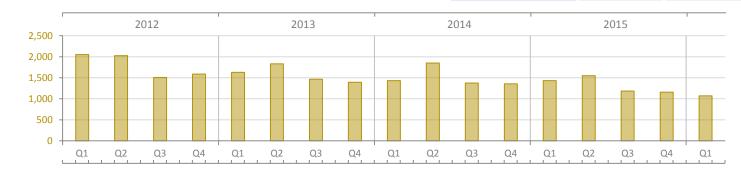

Percent Change Cash Sales Quarter **Cash Sales** Year-over-Year Q1 2016 1,071 -25.2% The number of Closed Sales during the quarter in Q4 2015 1,157 -14.5% Q3 2015 1,186 -13.7% which buyers exclusively paid in cash Q2 2015 1,551 -16.1% Q1 2015 1,431 -0.1% Q4 2014 1,354 -2.9% *Economists' note* : Cash Sales can be a useful indicator of the extent to Q3 2014 1,374 -6.3%

which investors are participating in the market. Why? Investors are far more likely to have the funds to purchase a home available up front, whereas the typical homebuyer requires a mortgage or some other form of financing. There are, of course, many possible exceptions, so this statistic should be interpreted with care.

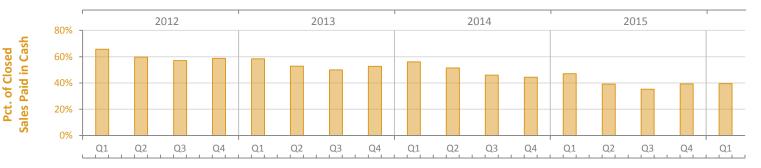

Cash Sales as a Percentage of Closed Sales

The percentage of Closed Sales during the quarter which were Cash Sales

Economists' note: This statistic is simply another way of viewing Cash Sales. The remaining percentages of Closed Sales (i.e. those not paid fully in cash) each quarter involved some sort of financing, such as mortgages, owner/seller financing, assumed loans, etc.

Quarter	Percent of Closed Sales Paid in Cash	Percent Change Year-over-Year
Q1 2016	39.5%	-16.0%
Q4 2015	39.2%	-11.5%
Q3 2015	35.2%	-23.3%
Q2 2015	39.1%	-23.9%

Q3 2013	49.9%	-12.5%
Q2 2013	52.8%	-11.6%
Q1 2013	58.4%	-11.1%

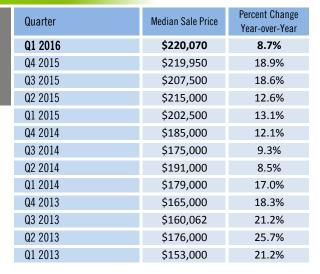

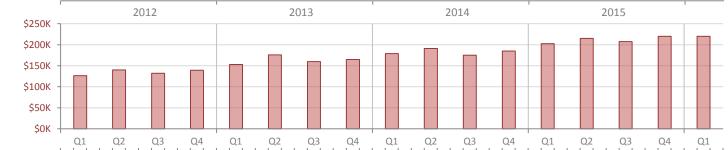

FloridaRealtors The Voice for Real Estate® in Florida

Median Sale Price

The median sale price reported for the quarter (i.e. 50% of sales were above and 50% of sales were below)

Economists' note : Median Sale Price is our preferred summary statistic for price activity because, unlike Average Sale Price, Median Sale Price is not sensitive to high sale prices for small numbers of homes that may not be characteristic of the market area. Keep in mind that median price trends over time are not always solely caused by changes in the general value of local real estate. Median sale price only reflects the values of the homes that *sold* each quarter, and the mix of the types of homes that sell can change over time.

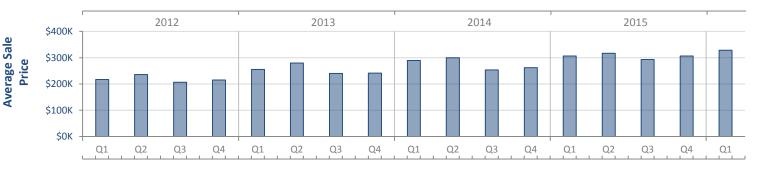

Average Sale Price

The average sale price reported for the quarter (i.e. total sales in dollars divided by the number of sales)

Economists' note : Usually, we prefer Median Sale Price over Average Sale Price as a summary statistic for home prices. However, Average Sale Price does have its uses—particularly when it is analyzed alongside the Median Sale Price. For one, the relative difference between the two statistics can provide some insight into the market for higher-end homes in an area.

Quarter	Average Sale Price	Percent Change Year-over-Year
Q1 2016	\$328,235	7.1%
Q4 2015	\$306,343	16.9%
Q3 2015	\$293,111	15.6%
Q2 2015	\$316,863	5.7%
Q1 2015	\$306,510	6.0%
Q4 2014	\$261,955	8.7%
Q3 2014	\$253,460	5.7%
Q2 2014	\$299,807	7.2%
Q1 2014	\$289,274	13.4%
Q4 2013	\$241,007	12.1%
Q3 2013	\$239,893	16.3%
Q2 2013	\$279,762	18.6%
Q1 2013	\$255,040	17.6%

Closed Sales by Average Sale Price. It is a strong indicator of the health of the real estate industry in a market, and is of particular interest to real estate professionals, investors, analysts, and government agencies. Potential home sellers and home buyers, on the other hand, will likely be better served by paying attention to trends in the two components of Dollar Volume (i.e. sales and prices) individually.

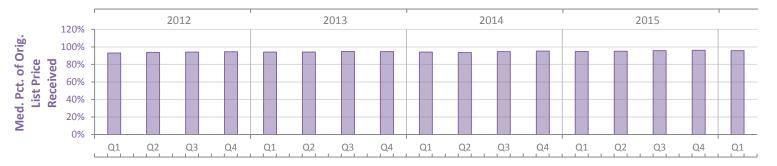

Median Percent of Original List Price Received

The median of the sale price (as a percentage of the original list price) across all properties selling during the quarter

Economists' note : The Median Percent of Original List Price Received is useful as an indicator of market recovery, since it typically rises as buyers realize that the market may be moving away from them and they need to match the selling price (or better it) in order to get a contract on the house. This is usually the last measure to indicate a market has shifted from down to up, so it is what we would call a *lagging* indicator.

Quarter	Med. Pct. of Orig. List Price Received	Percent Change Year-over-Year
Q1 2016	95.7%	0.9%
Q4 2015	96.2%	0.9%
Q3 2015	95.7%	1.1%

Q3 2013	94.9%	0.7%
Q2 2013	94.2%	0.4%
Q1 2013	94.2%	1.3%

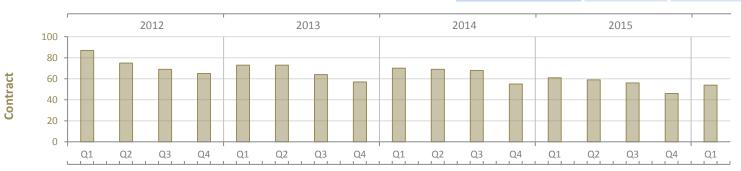

Median Time to Contract

The median number of days between the listing date and contract date for all Closed Sales during the quarter

Economists' note : Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the quarter. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

Quarter	Median Time to Contract	Percent Change Year-over-Year
Q1 2016	54 Days	-11.5%
Q4 2015	46 Days	-16.4%
Q3 2015	56 Days	-17.6%
Q2 2015	59 Days	-14.5%
Q1 2015	61 Days	-12.9%
Q4 2014	55 Days	-3.5%
Q3 2014	68 Days	6.3%
Q2 2014	69 Days	-5.5%
Q1 2014	70 Days	-4.1%
Q4 2013	57 Days	-12.3%
Q3 2013	64 Days	-7.2%
Q2 2013	73 Days	-2.7%
Q1 2013	73 Days	-16.1%

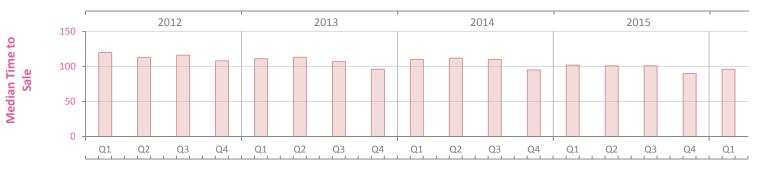

Median Time to Sale

Median Time to

The median number of days between the listing date and closing date for all Closed Sales during the quarter

Economists' note : Time to Sale is a measure of the length of the home selling process, calculated as the number of days between the initial listing of a property and the closing of the sale. *Median* Time to Sale is the amount of time the "middle" property selling this quarter was on the market. That is, 50% of homes selling this quarter took *less* time to sell, and 50% of homes took *more* time to sell. Median Time to Sale gives a more accurate picture than Average Time to Sale, which can be skewed upward by small numbers of properties taking an abnormally long time to sell.

Quarter	Median Time to Sale	Percent Change Year-over-Year
Q1 2016	96 Days	-5.9%
Q4 2015	90 Days	-5.3%
Q3 2015	101 Days	-8.2%
Q2 2015	101 Days	-9.8%
Q1 2015	102 Days	-7.3%
Q4 2014	95 Days	-1.0%
Q3 2014	110 Days	2.8%
Q2 2014	112 Days	-0.9%
Q1 2014	110 Days	-0.9%
Q4 2013	96 Days	-11.1%
Q3 2013	107 Days	-7.8%
Q2 2013	113 Days	0.0%
Q1 2013	111 Days	-7.5%

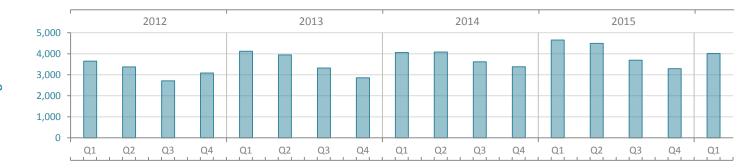

New Pending Sales

The number of listed properties that went under contract during the quarter

Economists' note : Because of the typical length of time it takes for a sale to close, economists consider Pending Sales to be a decent indicator of potential future Closed Sales. It is important to bear in mind, however, that not all Pending Sales will be closed successfully. So, the effectiveness of Pending Sales as a future indicator of Closed Sales is susceptible to changes in market conditions such as the availability of financing for homebuyers and the inventory of distressed properties for sale.

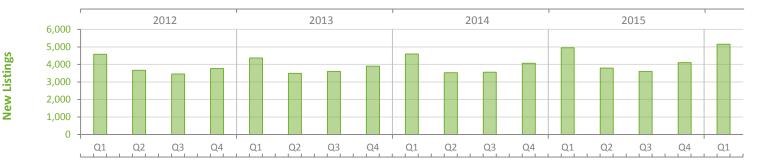

Quarter	New Pending Sales	Percent Change Year-over-Year
Q1 2016	4,014	-13.7%
Q4 2015	3,292	-2.6%
Q3 2015	3,693	2.2%
Q2 2015	4,491	10.0%
Q1 2015	4,653	14.7%
Q4 2014	3,379	18.2%
Q3 2014	3,614	9.0%
Q2 2014	4,081	3.4%
Q1 2014	4,055	-1.6%
Q4 2013	2,858	-7.4%
Q3 2013	3,317	22.2%
Q2 2013	3,945	16.8%
Q1 2013	4,120	13.0%

New Listings The number of properties put onto the market during the quarter

Economists' note: New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

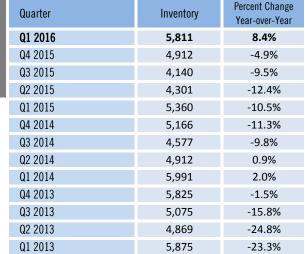

Quarter	New Listings	Percent Change Year-over-Year
Q1 2016	5,155	4.1%
Q4 2015	4,105	1.0%
Q3 2015	3,601	1.2%
Q2 2015	3,790	7.3%
Q1 2015	4,950	7.7%
Q4 2014	4,066	4.3%
Q3 2014	3,559	-1.1%
Q2 2014	3,532	1.3%
Q1 2014	4,596	5.2%
Q4 2013	3,900	3.6%
Q3 2013	3,599	4.1%
Q2 2013	3,488	-4.9%
Q1 2013	4,369	-4.6%

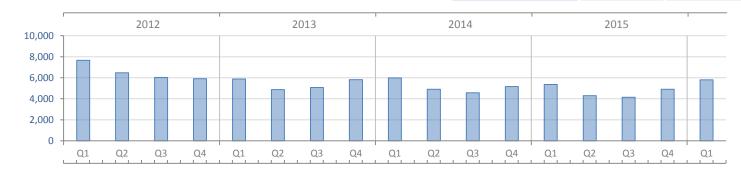

Inventory (Active Listings)QuarterThe number of property listings active at the end of
the quarterQ1 2016
Q4 2015
Q3 2015
Q2 2015Q1 2015
Q1 2015Q2 2015
Q1 2015

Economists' note : There are a number of ways to define and calculate Inventory. Here, we simply count the number of active listings on the last day of the quarter, and hold this number to compare with the same quarter the following year. Inventory rises when New Listings are outpacing the number of listings that go off-market (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going off-market.

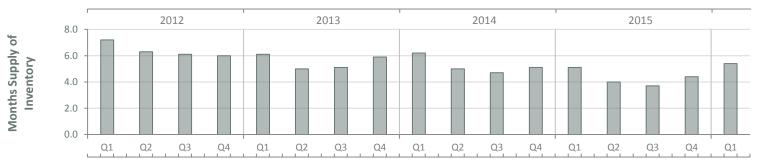

Months Supply of Inventory

An estimate of the number of months it will take to deplete the current Inventory given recent sales rates

Economists' note : MSI is a useful indicator of market conditions. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 months of inventory. Anything higher is traditionally a buyers' market, and anything lower is a sellers' market. There is no single accepted way of calculating MSI. A common method is to divide current Inventory by the most recent month's Closed Sales count, but this count is a usually poor predictor of future Closed Sales due to seasonal cycles. To eliminate seasonal effects, we use the 12-month average of monthly Closed Sales instead.

Quarter	Months Supply	Percent Change Year-over-Year
Q1 2016	5.4	5.9%
Q4 2015	4.4	-13.7%
Q3 2015	3.7	-21.3%
Q2 2015	4.0	-20.0%
Q1 2015	5.1	-17.7%
Q4 2014	5.1	-13.6%
Q3 2014	4.7	-7.8%
Q2 2014	5.0	0.0%
Q1 2014	6.2	1.6%
Q4 2013	5.9	-1.7%
Q3 2013	5.1	-16.4%
Q2 2013	5.0	-20.6%
Q1 2013	6.1	-15.3%

Closed Sales by Sale Price

Closed Sales

The number of sales transactions which closed during the quarter

Economists' note: Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales. Closed Sales (and many other market metrics) are affected by seasonal cycles, so actual trends are more accurately represented by year-over-year changes (i.e. comparing a quarter's sales to the amount of sales in the same month in the previous year), rather than changes from one quarter to the next.

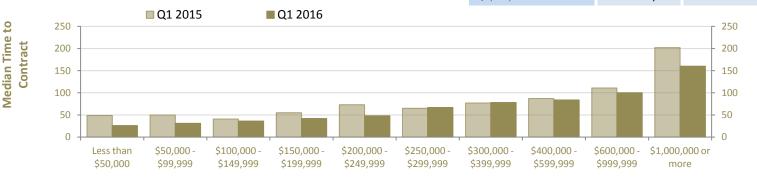

Sale Price	Closed Sales	Percent Change Year-over-Year
Less than \$50,000	40	-53.5%
\$50,000 - \$99,999	154	-44.4%
\$100,000 - \$149,999	434	-33.1%
\$150,000 - \$199,999	554	14.2%
\$200,000 - \$249,999	370	4.2%
\$250,000 - \$299,999	318	2.3%
\$300,000 - \$399,999	343	-1.4%
\$400,000 - \$599,999	261	-6.5%
\$600,000 - \$999,999	135	-11.8%
\$1,000,000 or more	104	2.0%

Median Time to Contract by Sale Price The median number of days between the listing date and contract date for all Closed Sales during the guarter

Economists' note : Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the quarter. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

Sale Price	Median Time to Contract	Percent Change Year-over-Year
Less than \$50,000	26 Days	-46.9%
\$50,000 - \$99,999	31 Days	-38.0%
\$100,000 - \$149,999	36 Days	-12.2%
\$150,000 - \$199,999	42 Days	-23.6%
\$200,000 - \$249,999	48 Days	-34.2%
\$250,000 - \$299,999	67 Days	3.1%
\$300,000 - \$399,999	78 Days	1.3%
\$400,000 - \$599,999	84 Days	-3.4%
\$600,000 - \$999,999	100 Days	-9.9%
\$1.000.000 or more	160 Days	-20.8%

New Listings by Initial Listing Price The number of properties put onto the market during

the quarter

Economists' note: New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

Initial Listing Price	New Listings	Percent Change Year-over-Year
Less than \$50,000	26	-66.7%
\$50,000 - \$99,999	161	-49.4%
\$100,000 - \$149,999	499	-39.3%
\$150,000 - \$199,999	891	17.5%
\$200,000 - \$249,999	726	31.5%
\$250,000 - \$299,999	600	18.3%
\$300,000 - \$399,999	821	13.2%
\$400,000 - \$599,999	709	11.3%
\$600,000 - \$999,999	427	29.4%
\$1,000,000 or more	295	32.3%

Inventory by Current Listing Price The number of property listings active at the end of the quarter

Economists' note : There are a number of ways to define and calculate Inventory. Our method is to simply count the number of active listings on the last day of the quarter, and hold this number to compare with the same quarter the following year. Inventory rises when New Listings are outpacing the number of listings that go off-market (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going offmarket.

Current Listing Price	Inventory	Percent Change Year-over-Year
Less than \$50,000	13	-69.8%
\$50,000 - \$99,999	119	-47.3%
\$100,000 - \$149,999	285	-42.9%
\$150,000 - \$199,999	603	-0.2%
\$200,000 - \$249,999	637	21.3%
\$250,000 - \$299,999	647	28.9%
\$300,000 - \$399,999	1,022	12.8%
\$400,000 - \$599,999	1,124	24.2%
\$600,000 - \$999,999	719	21.2%
\$1,000,000 or more	642	15.3%
